SUBJECT: 90% Residential Furnace Condensate Accessories

UNITS: Upflow and Counterflow 90% Residential Furnaces

In an effort to address occasional requests for missing condensate accessory bags in the upflow and counterflow 90% residential furnaces, a Bag O' Parts will be offered through Source One Parts.

The Bag O' Parts will have one part number 373-23752-001. This is a rationalized part serving the replacement of either an upflow or counterflow 90% furnace.

The Bag O' Parts contents are:

- (1) 025-31807-000 Threaded Bushing
- (1) 025-31808-000 Adapter Insert
- (1) 025-32683-000 Conduit Locknut
- (1) 028-14769-000 2" to 1-1/2" Reducer
- (2) 021-18390-000 Hose Clamp
- (1) 028-15162-000 2" Rubber Sleeve
- (2) 028-12103-000 .37 Tubing Cap/Plug
- (2) 1204-027 1-3/8" Snap Bushing (Evcon part number)
- (1) 028-15159-000 Vent Pipe Assembly
- (1) 028-15161-000 45 degree Street Elbow

Warranty claims should be submitted for any missing Bag O' Parts. We have also instituted process controls in the production process to insure that the Bag O' Parts are now included with current production furnaces.

Respectfully Submitted,

Jeff Preston
